-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 and 10-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 line 12 recites, "an extended protruded". It is unclear as to what is extended and protruding in this claim. This leaves the claim vague and indefinite.

Claim 10 line 10 recites, "an extended protruded". It is unclear as to what is extended and protruding in this claim. This leaves the claim vague and indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 10-13 and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawanishi et al (EPO 477,727).

Kawanishi et al discloses a body structure for a railcar comprised of a plurality of plates. First and third plates 23 are positioned on the right and left side of what would be a doorway for the end of the train. This is shown best in figures 3A-3C. A second plate 34 is positioned above the doorway. Each plate is bent at the ends to produce flanges.

Art Unit: 3617

The first and third plates 23 have flanges that correlate to the outer skin of the car body and flanges that correlate to the inner doorway of the car. The first and third plates also have flanges bent to correlate with the roof skin of the vehicle body. The three plates are welded together to form the end structure and the vehicle skins are then attached to the respective plates.

Allowable Subject Matter

Claims 5-9, 14-18 and 23-39 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dean US 3,151,574), Eggert, Jr. (US 4,211,173) and Ishida et al (US 5,458,066) all disclose types of constructions for rail car bodies.
